PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience designing, developing, and deploying scalable web and mobile applications using React.js, Next.js, NestJS, Angular, PHP, Laravel, Python, Django, React Native, JavaScript, TypeScript, Node.js, Express.js, PostgreSQL, MongoDB, and REST APIs. Experienced in building responsive user interfaces, scalable backend services, microservices, authentication, API integrations, document management systems, and cloud-based applications. Proficient in Docker, Firebase, AWS, Git, and GitHub, with strong knowledge of clean architecture, reusable components, database management, and Agile software development practices.

Technical Skills

Programming Languages:	JavaScript, TypeScript, PHP, Python, HTML5, CSS3, SQL
Core CS:	DSA, OOP, DBMS, System Design
Libraries/Frameworks:	React.js, Next.js, NestJS, Angular, React Native (Expo), Express.js, Laravel, Spring Boot, Redux, Node.js, Socket.IO, Tailwind CSS, REST APIs
Tools / Platforms:	Docker, AWS, GCP, Nginx, Firebase, Microservices, Microsoft Excel, Git, GitHub
Databases:	MongoDB, PostgreSQL, SQL, Redis
AI / GenAI:	OpenAI API, Prompt Engineering, AI Integration, ChatGPT, Claude
Soft Skills:	Problem Solving, Analytical Thinking, Communication, Team Collaboration

Experience

Blu Parrot Ventures Pvt Ltd | Full Stack Developer Full Time | Oct 2024 - present

- Developed Fluence Pay's User Panel using React Native, Expo, and TypeScript, implementing QR payments, digital wallet, transactions, and cashback features.
- Built Merchant Onboarding and Admin Panels using Node.js, Express.js, PostgreSQL, and Firebase for KYC, user management, merchant approvals, and analytics.
- Developed AUDITLab, a legal case management platform using React.js, NestJS, TypeScript, PostgreSQL, Redis, and AWS S3 for case, document, and workflow management.
- Built REST APIs and backend services for AUDITLab, implementing case intake, medical review, settlement workflows, reporting, and document management.
- Integrated AWS S3 and Needles for document storage and case data synchronization, and integrated authentication, cashback, notification, and wallet microservices using REST APIs, Docker, and Nginx.

Peregrine IT Solutions | Full Stack Developer Full Time | Sep 2023 - Oct 2024

- Developed responsive UI for a real estate platform (admin.coveagent.com) using Next.js, TypeScript, Tailwind CSS, and Redux, following modular and clean code practices.
- Managed complex application state using React Hooks and Redux, ensuring seamless data flow across the platform.
- Built reusable and scalable custom React hooks to streamline development and improve maintainability of frequently used logic.

Projects

AUDITLab *React.js, Node.js, NestJS, TypeScript, Redis, AWS S3, PostgreSQL, REST APIs*

- Legal case management and operations platform for law firms handling high-volume mass-tort portfolios, serving case managers, administrators, vendors, advocates, and clients through the Connect portal.
- Supports case intake, medical/exposure review, Smart Review, settlement workflows, checklists, reports, and classified document management.
- Built with a NestJS backend (auditlab-be), PostgreSQL, Redis, and React.js frontend (auditlab-fe), communicating through REST APIs, with AWS S3 for secure document storage and workflows.
- Synchronizes case data with Needles, the firm's existing case management system, while Connect provides a client-facing chat and document portal.

Fluence Pay *React Native/Expo, Node.js, PostgreSQL, Firebase, Microservices*

- Merchant: Built onboarding (applications, profile), transaction handling, and cashback campaigns; developed REST APIs for payments and funds.
- User Panel: Implemented QR scan-to-pay flow, transaction history, wallet, and Fluence Score cashback in the app.
- Admin Panel: Built merchant approval workflows, user/merchant management, and analytics dashboards.

- Integrated REST APIs across authentication, cashback, notifications, and points-wallet microservices for end-to-end payment and rewards flow.

SIS Certification *Python, Django, Django REST Framework, PostgreSQL, Pandas, REST APIs*

- Built a Certification Management web application using Python and Django with modules for lead management, proposals, training batches, and exam results tracking.
- Developed REST APIs and interactive admin dashboards for Cost Calculator, Training Matrix, and data analytics, including Excel import/export functionality using Pandas.
- Implemented reusable Django components for proposal pipelines, certification journey tracking, batch assignment workflows, and automated PDF report generation.

Education

Veer Kunwar Singh University 2021 - 2024
Bachelor of Business Administration (B.B.A.)

Certifications & Training

Coding Ninjas Jan 2023 - Jul 2023
Full Stack Web Development
